

120V Automated Keg Washer 30 Kegs/Hour

Equipment Specifications

Built to fit small spaces and tight budgets without compromising the needed performance. Our 120v keg washer has the ability to clean up to 30 kegs per hour using only 120V AC and compressed air. Simply engage the couplers invert the kegs and press the start button and walk away. The Fillmore 120v keg washer will automatically wash sanitize and CO2 pressurize any size keg in just minutes. With a compact frame of 34"x36" it's easy to roll it to where you need it and roll it out of the way when you're done.

PLC and Touch Screen Interface

The PLC automatically controls the pre-programmed washing sequence and all of the washing sequence timing can easily be adjusted at the touch screen interface.
