

220v Automated Keg Washer 40 Kegs/Hour

Equipment Specifications

Our two head keg washer is designed to wash two US Sankey kegs of any size up to 40 kegs per hour. Standing at a comfortable height of 36" the loading and unloading of kegs onto the machine is easy. Simply invert the kegs and press start and wait while your kegs are automatically washed, sanitized and pressurized. Utilizing 220v AC, compressed air and CO2, keg washing is made easy and efficient. Standing in a footprint of 36"x 42" with heavy duty casters, it's easy to roll this machine to where you need it and out of the way when you're done.

PLC and Touch Screen Interface

The PLC controls the pre programmed washing sequence and an adjustable detergent temperature control. All washing sequences are easily adjustable from the 6" HMI touch screen interface.
