

Side by Side Comparison between the 120v & 220V Fillmore Keg washers.

120v keg washer

Plugs into any standard outlet and has 1 pump and 1 25 gallon heated detergent tank. This unit uses a venturi for injecting sanitizer directly into the final rinse and does not require any additional tanks, pumps or additional wash cycles. Kegs are cleaned, sanitized CO2 purged and CO2 pressurized in 3-6 minutes.

220v Keg washer

Operates on 208-240v 1PH has a 25 gallon heated detergent tank with pump and a 25 gallon sanitizer tank with pump. Kegs are cleaned, sanitized CO2 purged and pressurized in 3-6 minutes.
